Junior Java Developer

SUMMARY

Java Full Stack Developer | MCA Graduate (8.87 CGPA) | 2025 Bangalore

Skilled in Spring Boot, React.js, and REST API development. Built production-ready applications with payment integration, real-time authentication, and cloud storage. Seeking a backend/full-stack role where I can contribute from Day 1.

SKILL

Programming Languages: Java, Python, C++, JavaScript (ES6+), SQL

Frontend Development: React.js, HTML5, CSS3, Tailwind

Backend & Frameworks: Spring Boot, Spring Security, JPA, REST APIs, Node.js, Hibernate, JUnit & Mockito, Maven

Databases & Tools: MySQL, MongoDB, Firebase Firestore, JDBC, Postman, PostgreSQL

Version Control & Concepts: Git, GitHub, Object Oriented Programming (OOP), System Design Fundamentals

WORK EXPERIENCE

Infosys Springboard — Virtual Intern | Virtual Internship 7.0

Aug 2026 – Present

- Selected for Infosys Springboard Virtual Internship 7.0 after completing the required technical learning modules.
- Working on an assigned real-world project as part of the internship, applying technical knowledge to practical software development.

Unified Mentor — Full Stack Web Development Intern

Jun 2025 - Sep 2025

- Engineered a role based web application with distinct Admin and Member login portals, serving approximately 120 active users and reducing login errors by 30% through streamlined authentication flow.
- Implemented a real time data layer handling member registration, billing, renewal tracking, and diet plan management, processing over 500 transactions monthly and enabling instant status updates for users.
- Designed a responsive UI across desktop and mobile devices and integrated Firebase authentication, achieving a 95% satisfaction rating in user testing and supporting seamless cross platform access.

PROJECTS

NKManage — Employee Management System | Spring Boot · React · MySQL · JWT · Tailwind CSS | [Link](#)

April 2026

- Developed a full-stack employee management system with JWT authentication, role-based access control (3 roles), and invite-only registration via email.
- Built modules for attendance tracking, salary calculation, payment management, tool inventory, and data visualization.
- Implemented forgot password with OTP verification, global search, and profile management with BCrypt password security.

CloudShare – Cloud File Sharing & Subscription Platform | [Link](#)

Jan 2026 - Feb 2026

- Built a secure cloud file sharing application with subscription plans and payment integration.
- Implemented Clerk based authentication and JWT secured backend APIs.
- Developed REST APIs for user profiles, credits, transactions, and file management.

RDGo - Ride Booking Application | [Link](#)

Nov 2024 - Jan 2025

- Developed a responsive ride booking web app integrating Google Maps API for live location and route tracking.
- Implemented OTP authentication using Twilio API.
- Focused on full stack integration and API handling between front end & back end.

EDUCATION

Dayananda Sagar College of Engineering

Bangalore

Master of Computer Application(MCA)

Sep 2023 - Oct 2025

- CGPA: 8.87

Doranda College, Ranchi

Ranchi

Bachelor of Information Technology(B.Sc IT)

Aug 2019 - Oct 2022

- CGPA: 8.51

CERTIFICATIONS

- 5 Day Hands on Generative AI workshop (RAG): From Innomatics Research Labs

ACHIEVEMENTS

- Solved 200+ coding problems: On LeetCode, GeeksforGeeks, and Coding Ninjas using Java [LeetCode Profile](#)
